

## FEBRUARY 2021 RELEASE NOTES

### New Feature

| Title  | Description   |
|--|---|
| Compliance restriction exporting from Mexico | To meet Compliance requirements, logic has been added into FlashTrac to only allow exports from Mexico into either USA or Canada. No other countries will be permitted or selectable in order entry. For customers placing orders via B2B, these orders will go to the exception board as an order exception. |
| Moves & Exits                                | Significantly upgraded the FlashTrac inventory control tools and processes to streamline and automate warehouse (FSL, DC, GSC) moves and exits.   |

## Maintenance

| Title                                     | Description  |
|---|--|
| Maintenance request for old orders/alerts | Based on rules provided by Inventory Control, provided a maintenance clean-up of older "open orders/alerts" either by canceling orders, canceling alerts, or closing orders.                       |
| Autogenerated email subject updates       | Updated logic to provide the service type at the start of the email subject line. DRIVE or SCHEDULE or ETC...  |
| Update to FlashTrac home screen           | Updated FlashTrac home screen to include<br>- The latest FlashTrac URL (please update your bookmarks).<br>- Internet Explorer <b>is no longer supported</b> . Please use Chrome, Edge, or Firefox. |
