JULY 2020 RELEASE NOTES

Features

Title	Description
MPL update: SG and EU ECCN	Added 2 new fields to the MPL template Compliance section, which will allow customers to provide export classification for Singapore and European export orders.
Visibility to Flash available rental space globally in the AMD Facilities details page	Our FSLs now have the ability to provide visibility into the available space in Flash warehouses. This will enable Flash to support current customer inquiries to expand their global reach, as well as new customers who would like to join the Flash network.
Customer rental invoice was modified to remove the warehouse currency code.	To remove confusion, we eliminated the local warehouse currency from the customer rental invoices.
Refurbished products	New functionality has been created to support the identification and import compliance management of refurbished product globally.
Enhancement to the IEMS commercial invoice	Add the visibility to customer-provided commodity codes in addition to the US HTS. The following commodity codes are available: BR NCM for LATAM countries EU HS for EU countries SG HS for Singapore CA HS (CBSA) for Canada

Maintenance

Title	Description
Customer Pricing Scheme	Corrected: Ability to select to charge by both piece and line. This change restricts selection one option.
Resubmitting Failed Order Creation Messaging	Added functionality to recheck and resend Order Creation emails. All failed emails will be rechecked twice before being marked as undeliverable.
Invoicing Maintenance	Removed COVID surcharge (as of orders transacted August 1).
Email Message Maintenance	Improving internal message creation performance.
Updating Cancel Page	Adding new cancel reasons to Cancel Order tool.
