1	Testpart	1	Each	DK		For testing purposes only	1																																										
2	Testpart	1	Each	DK		For testing purposes only	2																																										
3	Testpart	1	Each	DK		For testing purposes only	1																																										
4	Testpart	1	Each	DK		For testing purposes only	5																																										
Total Parts Qty On Order: 9																																																	
Service level agreement calculations for 3rd party carrier services	We've removed some unused functionality to eliminate confusion when setting up service level calculation configuration for third-party carriers.																																																
Master parts list management	In order to ensure part details are managed based on subject matter expertise, we have divided the internal version of the master parts list into three (3) sections, Inventory control data, Trade compliance data and Hazmat/Dangerous Goods data. This will enable the subject matter experts to manage their respective areas.																																																
Add "MasterId" on Exception Resolution Screen	This feature will assist Inventory Control in resolving exceptions and provide visibility to linked exceptions.																																																

Labels	Release Note Title	Release Notes Description
Back_End	ISO country table update	We updated our Country table to be consistent with ISO standards
