Order management – new automated confirmation and billing flag	Added automation to support the identification and automated billing of orders created manually by Flash personnel.
Compliance Hold management	Created a Compliance Hold tool that will provide greater efficiency to the Trade Operations management team.
Security updates	Redesigned user authentication and user support tools, including support for improved password protocols and multi-factor authentication.

Maintenance

Title	Description
Cycle Count Scanning Update	Made improvements to the Parts or FLPN Scan functionality.
MPL Compliance data	Update to share multiple ECCNs from the MPL to the Import and Export Management System.
Status field update	Update to MPL file manager to differentiate between partial updates and completed updates.

Date Overflow issues	Removed the issue where null date field was causing unneeded error logging.
Fix bug on State and Country fields.	Fixed the issue where tabbing of address fields caused an error.
Google Maps (Esri) removal from certain drive situations	Removed conflicting functionality related to Drive orders. The ETA will always be the same as the Service Level for 2- and 4-hour drives.
HK to HK compliance regulation update	Removed the requirement for orders shipping from HK to HK to have a Commercial Invoice.
Facility Label Configuration	Change to allow a specific label type selection to be available for any facility.
Issue with waybills on bill alerts	Corrected issue where waybills were not properly saving due to value lengths.
SLA Calculations	Corrected an SLA calculation issue during multiple consecutive holiday days.
Update Replenishment Report	Update report to reflect changes to min/max.
Remove Duplicate CIs from Orders	Removing CIs uploaded as part of IOR/EOR process.
Back Order Process	Updated Swap Part process to execute Order Exceptions before opening order.
Order entry 2.0 browser error	Corrected an issue where the SLA format popup message would not clear and users could not continue (Chrome Only).
Cycle Count	Corrected error when clicking Doc # link from Agent First Pass screen.
